Monarch High School Community Service Program

The Community Service Program allows students in grades 9-12 to earn 5 elective credits. Students must volunteer 75 hours for 5 elective credits awarded. This can only be done one time. Community service need not be completed within 1 semester.

Community service opportunities may be in the areas of education, physical or mental health, recreation service, or cultural groups. Examples of community service work: tutoring younger students, volunteering at a hospital, being a peer counselor at a camp or school, volunteering at a library, cleaning up parks, volunteering for animal protection agencies, volunteering at a senior center, church youth group, etc.

The student is a representative of Monarch High School and as such, mature and responsible behavior will be expected at all times. These expectations include appropriate dress for the site, arriving on time, communicating with your supervisor if unexpected circumstances arise, and a positive attitude.

Community Service hours **MUST BE PRE-APPROVED** by school officials before beginning the community service. Complete the following section, have your guardian sign, and return the application to a counselor in the Counseling Office for approval. Then complete the Community Service Log to document hours. Turn in to your counselor upon completion of a minimum of 75 hours.

Parent Name: _____ Parent Signature: _____

Preliminary approval by Administrator at the start of the Community Service Program.

Administrator: _____ Date: _____

Complete log of activities and hours spent during the Community Service Program.

75 hours = 5 credits
